

Car Seat Recycling

When a car seat is no longer safe to use, be sure to recycle it. The Injury Prevention Program at Children's Hospital Los Angeles can help!

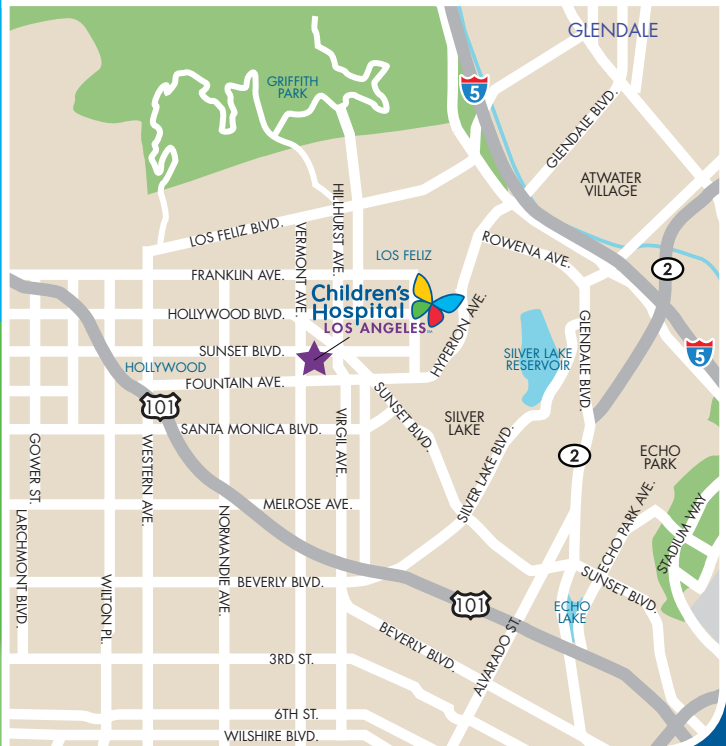

Car seats expire six years from their manufacture date (which can be found printed on the car seat). Seats that are expired or have been involved in a car accident, no matter how moderate or severe the crash, should be discarded.

Car seats can be dropped off at the main entrance of Children's Hospital Los Angeles between 10 a.m. – 3 p.m. on the first Friday of each month.

Why recycle car seats?

- To prevent circulating damaged or expired car seats into community
- At least 90 percent of car seat material can be recycled

Let Children's Hospital Los Angeles help you keep kids safe and protect the environment!
